**Net WT 8 LBS (3.629 KG)**

Contains up to 50% Coated Seed • Yellow Jacket Coating • See Product Label on Bag.

## **Antler Boost TRANSFORM™**

Food Plot Formula is designed to transform your plots into a year round food source. TRANSFORM is a cross between varieties in our ENTICE and ACCELERATE food plot formulas plus an added attraction seed (forage radish). This blend is 5 carefully selected seed varieties that we have over 10 years experience in planting. These seed varieties are red clover, chicory, white clover, forage rape and forage radish. TRANSFORM has both antler and body growing ability as well as plenty of food to attract your deer (and your neighbor's deer) in the Fall/Winter. TRANSFORM can produce up to 4 tons of food per 1/2 acre in a year's time.

## **PLANTING TIMES**

Midwestern and cold states plant late July thru late August, Southern and warm weather states plant early September thru mid October. This is designed to be an annual formula so you will normally plant it yearly.

## **pH REQUIREMENTS**

Obtain a soil sample to determine soil pH. For TRANSFORM, the recommended pH is 5.6 and higher. If you use SOIL BOOST Plot Fertilizer it will raise your pH slowly and you can get decent growth down to 5.2 pH - the higher the pH the better the growth so apply 1 ton of lime per 1/2 acre if your pH is lower than 5.6.

## **PLANTING STEPS**

Disk or till your plot at least 6 inches deep to create a seedbed with dirt clods golf ball size or less. Small plots are fairly easily manually tilled with a garden tiller which can be rented locally. After disking/tilling, drag the plot surface fairly even with a baseball infield drag or piece of chain link fence weighted down. Then firm the seedbed by running over with a lawn roller or cultipacker or even with the tires of your golf cart or 4-wheeler. At this point apply fertilizer - we recommend using our SOIL BOOST Plot Fertilizer which can be easily applied with a low cost backpack sprayer or an ATV or tractor sprayer. Last step is to simply spread the TRANSFORM seed on top of the firm seedbed and let Mother Nature press the seed in with rainfall. Then wait for the growth to start!

## **NOTICE TO CONSUMER:**

The Seed laws of several states including Arkansas, California, Florida, Georgia, Idaho, Indiana, Mississippi, North Dakota, South Dakota, South Carolina, Texas, and Washington require arbitration or conciliation of disputes involving the quality or performance of seed before litigation. A complaint (sworn for AR, FL, IN, MS, SC, TX, WA; signed only CA, ID, GA, ND, SD) must be filed with the Commissioner, or Chief Agriculture Officer within such time as to permit inspection of the seed, crops, or plants by the designated agency and the seller of the seed. A copy of the complaint must be sent to the Seller by registered mail.
